

## ACADEMY SPORTS TURF. EXPERTS IN TURF.

Using state-of-the-art installation methods and products, Academy Sports Turf provides the safest playing surface available. In fact, the Brock™ high-performance drainage and impact layer under the artificial turf is engineered just for playgrounds. The Brock™ layer reduces the cost and improves the safety and performance of synthetic turf by providing a supportive base which creates a softer, more natural surface to cushion falls and prevent injuries.

Academy Sports Turf's high-quality products and expertise in turf utilization has made us one of the leading providers in the industry. And no matter what your needs, we can customize a product that works for you. Academy Sports Turf will begin by talking with you in-depth to learn the exact use and application of your turf. Using state-of-the-art turf technologies, we will craft custom-made sub-surface and surface materials to meet your requirements. Even after your turf is in place, we go the extra mile and continue to provide ongoing maintenance and customer support. To learn more about the advantages of using our synthetic turf, call Academy Sports Turf at 303.789.3172 or visit us online at: [www.academysportsturf.com](http://www.academysportsturf.com).

*Safe and great looking year round is why Academy Sports Turf is the top choice for playgrounds.*
